To: Commanding General, AMC
From Brad P. Giordani, President

Subject: Your July 25th AUSA News Article

1. I was very encouraged when I read the recent article in the AUSA news letter titled, Lifecycle Management "Commands are working". When I read the article concerning feedback in both directions it got my attention, especially when you said, "If I don't know about it, I can't fix it". That is exactly why I am sending you this memo offering our assistance.
2. The two AMC initiatives cited in the article state, (A) Provide commanders in the field with single point of contact within AMC to meet the unit commanders needs, and (B) to encourage industry to provide feedback to them on how they are doing.
3. Militec, Inc has documented proof that Picatinny Arsenal and Rock Island are preventing our troops from acquiring the proper gear needed to survive combat missions. The evidence required to root out this misconduct is documented in the three (3) enclosures cited below.
4. ARDEC-TACOM-RI has cancelled numerous emergency orders, including orders placed by several of the 3rd ID Commanders while they were rolling into Baghdad in March 03. These Commanders were not notified that their emergency orders were cancelled. Civil servants would not have gotten away with screwing our troops during World War Two.
5. Militec, Inc. created a multi-million dollar demand from our troops requesting our dry lubricant called MILITEC-1. As a result of this unprecedented demand, ARDEC is not allowing our troops to receive the exact product they requisitioned through the supply channels.
6. I respectfully request a meeting with your staff, ASAP, so you and others are not blindsided when Congress and others intervene into Picatinny's and Rock Island's contracting practices.
7. I enjoyed meeting you and Lew Ashley at the conference last May and stand ready and willing to provide continued support to America's Warfighters in their time of need. I pray you can help. God Bless You!
